TRAILERS**

MAKES IT HAPPEN

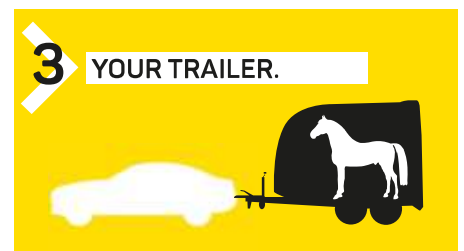

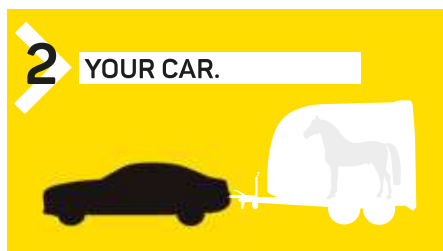

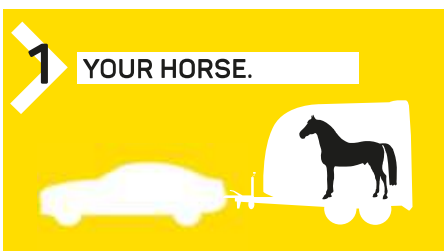

HUMBAUR

IN GERMANY

Trailer brand no. 1*

*Total number of new registrations in Germany in 2018 in the segment of motor vehicle trailers with a permissible maximum weight of up to 3.5 tonnes;

Source: Management Services Helwig Schmitt GmbH

STRENGTHENED BY EXPERIENCE

Humbaur stands for innovation and customer-oriented solutions. With this approach, the owner-managed, medium-sized family business has become the **European market leader**. With around **420 different series-production trailer models** from 750 kg to 50 tonnes for commercial and private clients and 230 models of the FlexBox vehicle bodies, it offers a suitable solution for every transport problem. For over 30 years we have built a wealth of experience, together with our trading partners and customers, that is reflected in each of our products — **in sophisticated functions and details, greater user-friendliness and a high level of driving comfort**.

Our trademarks include robust and low-maintenance vehicles with an extensive range of standard equipment, as well a wide range of accessories plus the ability to offer customised solutions.

Our own manufacturing expertise—ranging from small metal parts to polyester roofs or sandwich panels—combined with quality components from renowned manufacturers, ensures **durable products which retain their value well**.

Ulrich Humba
Proprietor, Director/CEO

Together with our **partner network**, we provide comprehensive local support for all transport matters. Together, we will find the right solution for your transport requirements and will take care of **servicing and repairs**. Our service promise includes reasonably priced repair options, as well as the **long-term availability of spare parts** so that you can get the most enjoyment and use out of your trailer or vehicle body.

OUTSTANDING QUALITY

We place great importance on the fact that our products operate even under **tough conditions** with no nasty surprises. We construct our trailers in robust designs using suitable materials of the required strength. We simulate the hardest conceivable use for our trailers on various test tracks. We check the stability and durability of the chassis, frame and components at full load. This is how we ensure the **outstanding quality** of our trailers.

Our **quality management system** is certified according to **DIN EN ISO 9001:2015** and **KBA-ZM-A** and is regularly reviewed. We are also certified by numerous commercial vehicle manufacturers as a construction and reconstruction partner for the vehicle body segment. We can regularly document **our quality promise** through recurring checks and through our products themselves.

As a customer, you benefit from this twice:
While using and when reselling.

YOUR ADVANTAGES AT A GLANCE

Space for your horses

MAXIMUM SPACE FOR YOUR HORSES

A **roof which is pulled far forward** offers your horse **generous headroom** even at ear level.

The AERO models have approximately 20% more space for your valuable saddles and other personal accessories in the standard tack room.

EquiSpace® concept

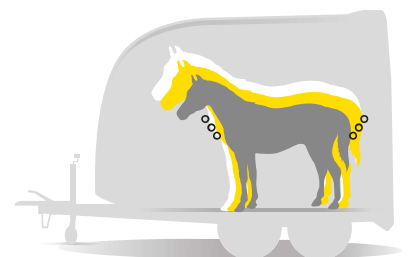

SAFETY AND COMFORT

The sophisticated **EquiSpace® interior concept** ensures **maximum space** for the horses in the trailer during transport and is integrated **as standard** in many models.

The adjustable breast and breech bars ensure that small and large horses travel **safely**. Of course, a **panic release feature** is also included.

The divided, padded and moulded* breast and breech bars can be mounted individually at three different levels and depths.

DESIGN AND COLOUR VARIETY

Do you have a **favourite colour**? Then select it from the current **RAL fan deck!**

FURTHER INFORMATION
humbaur.com/en/design-configurator

* Except Equitos and Single models.

All information is provided without guarantee. Subject to change without notice. Images may show optional equipment. Accessories are available as an option.

Extra-large saddle compartment

PLENTY OF SPACE FOR SADDLES & ACCESSORIES

Spacious saddle compartments, which are ideal for all types of saddle.

Includes a comprehensive range of equipment: mirror, net, interior lighting, shovel and broom*

Handle your saddles comfortably thanks to the retractable slider (standard on some models).

Extra-large access doors

EquiLock® partition

LOCKABLE PARTITION

The standard partition locks mechanically and can be assembled and disassembled without tools.

The partition is securely locked even when the tailgate is open!

Can be assembled and disassembled without tools. The partition is securely locked even when the tailgate is open.

OPTIMAL INDOOR CLIMATE

The vent windows and the standard wind deflector ensure a pleasant interior climate both when driving and while stationary.

The tinted and five-way adjustable vent windows provide an optimum air supply. The exclusive Humbauro wind deflector offers draft-free ventilation and continuous air circulation.

YOUR ADVANTAGES AT A GLANCE

**AluBiComp
floor**

**ROT-PROOF
STURDY**

Thanks to its sophisticated **composite panel construction** (two cover layers made of specially coated aluminium sheets with a polypropylene plastic core), the AluBiComp floor* is rot-proof and sturdy.

It can therefore easily **withstand high point loads caused by heavy horses.**

The small tailgate gap prevents the horse from slipping.

**SMOOTH SURFACES,
EASY TO CLEAN**

Our **RTM process** (Resin Transfer Moulding) – a resin injection process with closed moulds) – creates light-weight components (e.g. roof hoods, saddle compartments or the side walls) which have **very smooth surfaces on both sides.**

They are **stain resistant** and therefore **easy to clean.**

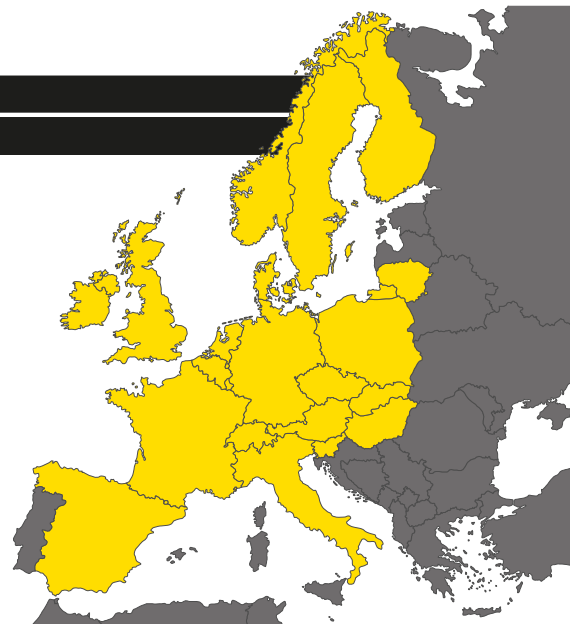

**CLOSE DEALER AND
SERVICE PARTNER NETWORK**

Our extensive network of trading partners and workshops provides **expert advice when purchasing** and **quick assistance when servicing.**

All over Europe. Find your nearest dealer or service partner easily online via our search function:

humbaur.com/en/finding-a-dealer

**EquiDrive®
chassis**

**STABLE
HANDLING**

The Humbauro EquiDrive® chassis is hot-dip galvanised to provide a **high level of stability and therefore optimum safety.**

With a low centre of gravity, it ensures a **smooth ride for both driver and horse.**

The trailer is easily accessible thanks to its low loading height.

**EquiDrive® PLUS S
coil spring suspension**

**MAXIMUM
SAFETY**

The EquiDrive® PLUS S coil spring suspension provides **perfect driving comfort** and ensures **reliable road holding regardless of the surface.**

- Brilliantly comfortable suspension by using passenger car technology.
- Maximum safety for your horses while driving.

**EquiDrive® PLUS
chassis**

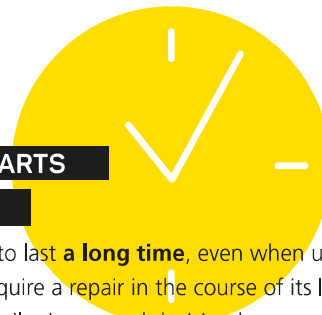

**FOR EVEN MORE
DRIVING COMFORT**

Even more safety for your horses during transport in the trailer.

- Automatic brake adjustment ensures consistently optimal braking behaviour.
- Largely maintenance-free braking system.
- Already meets future legal requirements.

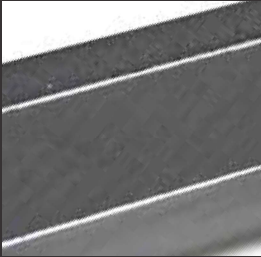

**LONG-TERM SPARE PARTS
AVAILABILITY**

Our products are designed to last **a long time**, even when used on a regular basis. Should your trailer require a **repair** in the course of its long life nevertheless, a Humbauro horse trailer is a **sound decision** because spare parts will remain **available for many years.**

OUR RANGE OF ACCESSORIES

BODY

AluBiComp floor (standard on some models), rot-proof, non-malleable

Kick plate for the saddle compartment

Central post divider (available as an option for Notos models)

Side padding

Rotating/swivelling tailgate

End-to-end box rod for transporting foals (standard on some models)

Side kick plate (partly standard)

Skylight

Retractable Western-style saddle holder (optional)

CHASSIS

Wheel shock absorbers (standard on some models)

Alloy wheels to visually enhance your horse trailer (example design)

Safety coupling with track stabilisation

Spare wheel (mounted)

Two-tone alloy wheels (silver/black) to give the horse trailer an exclusive look (standard on some models)

In addition to the **extensive standard equipment** for our trailer and vehicle bodies, we offer a wide selection of accessories **to suit each model**. This means that you can configure just the right solution for your transport needs according to **your individual requirements** and you can grow alongside your transport requirements.

Foal grid

PVC tarpaulin blind (instead of wind deflector)

Wireless camera with monitor for the interior. Can also be used as a rear-view camera or coupling aid, with battery

TRAILER DESIGN

Choose from a variety of smaller motifs or striking full-body adhesive film!

WHICH TRAILER FLOOR ENSURES SAFE TRANSPORT FOR MY HORSE?

Your **horse's safety** should take priority when buying a horse trailer. The trailer floor is an important factor in this regard. Depending on the material, important care instructions must be observed in order to ensure safe horse transport.

WOODEN FLOOR

POTENTIAL RISKS

Damage to the trailer floor may result in the ingress of moisture over time. As a result, the wood becomes soft and rotten. The extent of the moisture damage cannot usually be seen with the naked eye. In the worst case, your horse could break through the rotten trailer floor.

TIP

It is therefore highly advisable to have wooden trailer floors **checked regularly** to ensure that such situations do not occur in the first place. If damage is found, we advise against repairing the affected areas individually, as the extent to which the moisture has spread cannot be clearly identified. In this case, we recommend replacing

damaged rubber mats immediately. It is important that the **rubber mat is firmly glued** to the trailer floor.

The silicone seams between the floor and the wall should also be checked regularly. Small cracks may make the sealing protection ineffective and allow the ingress of moisture. To prevent damage to the trailer floor, the trailer should **always remain dry if possible.**

Horse trailers are often parked in a meadow. The misty and damp conditions affect the trailer floor over time. It is best to leave the trailer on a tar-macked road. **Sealing with underfloor wax** can also protect the floor.

ALUBICOMP FLOOR

Trailers with AluBiComp floors are significantly less problematic. There are no concerns regarding the trailer floor. We therefore recommend that you choose an **AluBiComp floor** when you **buy a horse trailer**:

The **composite panel design** consists of two outer layers, which are made of a specially coated aluminium sheet and a polypropylene hard foam core.

Moisture-resistant

The special coating of the aluminium panels prevents oxidation caused by ammonia in horse faeces. Thanks to its sophisticated design, the AluBiComp floor **does not rot and is sturdy.**

The floor withstands different temperatures and temperature fluctuations and thus provides **safe transport** of the horses.

WARNING
The TÜV-badge does not guarantee an undamaged trailer floor.

It is important to note that the TÜV only tests the roadworthiness of the trailer. A TÜV badge therefore does not protect against rotten trailer floors. We also recommend visiting a specialist workshop once a year to avert potential risks.

HOW DO I CLEAN MY TRAILER PROPERLY?

The **service life and functionality** of a trailer depends on how often and how thoroughly the trailer is cleaned and serviced. The frequency of cleaning and maintenance depends on how often the trailer is used, the operational environment and the level of contamination.

GENERAL TRAILER CLEANING

We recommend that you clean your trailer **regularly**. If possible, ensure that you clean your trailer directly after use as stubborn dirt could accumulate and corrode the trailer parts.

01 REMOVE COARSE DIRT

First, use a brush to remove **coarse dirt** from the interior floor.

Remove the **wear mats**.

The interior floor can then be rinsed with lukewarm water and neutral cleaning detergents.

02 CLEAN BY HAND

Clean stubborn dirt and **delicate parts** by hand.

03 CLEAN THE INTERIOR

Rinse the interior walls and floor by hand with **lukewarm water** and **neutral cleaning detergents**.

04 VENTILATE THE INTERIOR + LEAVE TO DRY

Allow the trailer interior to **dry thoroughly** after cleaning. If necessary, remove any water that has accumulated with a brush and a cloth.

Reinstall the **wear mats** once the trailer interior is **completely dry**.

Mould formation and moisture damage can be prevented by **adequately ventilating** the interior.

WARNING

NOTE BEFORE CLEANING!

- Disconnect the power supply before cleaning
- Where possible, clean new trailers with clear, cold water only in the first few months of use.

- **Do not clean with a high-pressure washer!** In particular, the following parts should never be directly exposed to high pressure:

Electrics

Tyres

Wheel shock absorbers

Pneumatic springs

Coupling head

Signage

Hydraulic system

Seals

→ We recommend cleaning these **delicate parts by hand**. It is best to use a damp cloth.

05 OIL + LUBRICATE

Ensure that you re-oil or re-lubricate the **oiling and lubrication points** of moving parts.

OUR TIP

We also supply special GRP cleaner and GRP polish. Maintain the value of your all-poly trailer!

humbauro.com/en/useful-information

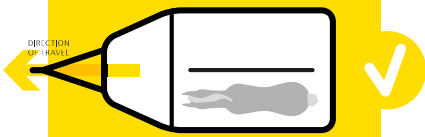

OPTIMAL TRANSPORT OF HORSES IN THE TRAILER: CORRECT POSITION AND SAFETY

The **safety** of your horse or horses takes priority during transport in the horse trailer. So that nothing happens to the animals and to ensure a smooth journey, it is important to load the horses properly and secure them in the trailer as well as possible. We have compiled the most important basic rules for you here.

2-BERTH HORSE TRAILER WITH ONE HORSE

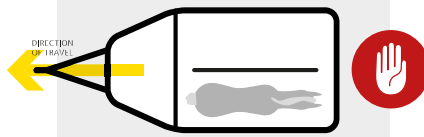

CORRECT:

The horse is positioned on the left-hand side facing the direction of travel.

INCORRECT:

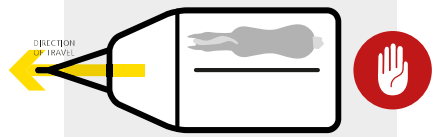

The horse is positioned facing backwards.

The **braking behaviour** is negatively affected. In addition, the trailer tends to **fishtail and swerve more quickly**.

INCORRECT:

The horse is positioned on the right-hand side.

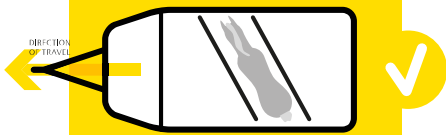

If the horse is positioned **kerbside when driving on roads with unprotected kerbs**, the trailer can **topple over**.

The **braking behaviour** is negatively affected. In addition, the trailer tends to **fishtail and swerve more quickly**.

3-BERTH HORSE TRAILER WITH ONE OR TWO HORSES

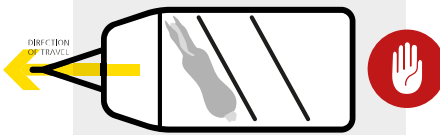

CORRECT:

The horse is positioned in the centre facing the direction of travel.

INCORRECT:

The horse is positioned in the front-most berth.

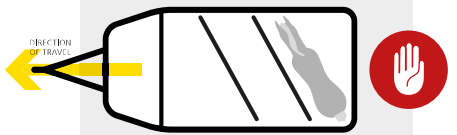

The front axle of the trailer and the rear axle of the towing vehicle are **overloaded**.

Overloading occurs when the load on the coupling becomes too high.

The **braking behaviour** is negatively affected. In addition, the trailer tends to **fishtail and swerve more quickly**.

INCORRECT:

The horse is positioned at the back.

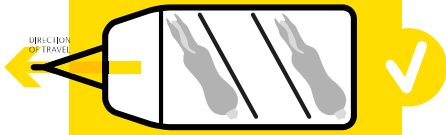

The **trailer tilts backwards**, the towing vehicle tilts forwards = the load on the coupling is too low or negative.

The rear axle of the trailer and the front axle of the towing vehicle are **overloaded**.

The **braking behaviour** is negatively affected. In addition, the trailer tends to **fishtail and swerve more quickly**.

CORRECT:

The horses are positioned in the back and front-most berths.

OUR TIP

If the horse's weight shifts during transport, this can cause the trailer to fishtail — **Risk of accident!**

Before departure, check that your horses are secured with the **breast and breech bars**.

Follow the safety information and instructions for load securing and load distribution
OPERATING MANUAL "HORSE TRAILER" GENERAL-PART 1.
